

DINO6 Sediment Removal System

The Dino6 is a small dredge machine used to remove accumulated sludges and sediment from a body of water. It is the most affordable small diesel dredge in its class. Simple and easy to operate, the Dino6 portable dredge barge boat is more durable than machines weighing and costing twice as much.

Please Call for Pricing Inquiries.

Standard Floating Discharge Package

Our Standard Floating Discharge Package (Approx 220' on the Water) Includes:

- 7 - 6" SBR 150psi Discharge Hose Assembly x 15ft long
 - 1 - 6" HDPE pipe assembly x 13ft long with 6" x 10ft HDPE float
 - 5 - 6" HDPE pipe assembly x 20ft long with 6" x 13ft HDPE float
